

BarPad

Cushioning Sealing Washers

Sealing Technology

- » Highly compressed, non-asbestos gasket
- » Composition: Aramid within a fully cured Nitrile Butadiene binder
- » Can withstand temperatures up to 750°F (398°C)
- » Good tensile strength
- » Low creep relaxation set
- » No melting point
- » Low flammability
- » Excellent fuel and oil resistance

Performance Advantage

- ✓ Padded fiber cushioning & sealing washer
- ✓ Non-marring to prevent scoring, scratching and cracking of expensive finished surfaces
- ✓ Dampens noise and vibration
- ✓ Ideal for high temperature applications
- ✓ Applications include:
 - Stoves
 - Ovens
 - Ranges / cook tops
 - Any appliance where high temperatures or sensitive surfaces are considerations

Washer Material

- 3003 H14 Aluminum

Finish Options

- Aluminum

Special Sizes

- Available upon request
